

PIC/D-129/60
15 November 1960

MEMORANDUM FOR: Deputy Director/Intelligence

SUBJECT : [] Report Statistics

25X1

1. Pursuant to our 14 November discussion of the [] Study PIC manning projection, page 8 of the report notes a future need of from [] interpreters. On page 10 this figure is more specifically spelled out in a 1965 estimate calling for [] detailed studies interpreters plus another [] interpreters to handle scan and comparative analyses. Thus [] interpreters is the base figure which the report cites and this figure is qualified to the extent that the [] concept of automation et al would have to be in effect. If such a concept were not in effect, i.e. if the Center's modus operandi went unchanged, then [] interpreters would be required.

2. The report made no attempt to assess support personnel requirements in any way. Our experience generally reflects a four to one support to interpreter ratio, hence a hybrid [] five year look suggests a [] man staff.

3. In summary, I believe you would be justified in citing our projected [] Center as a very conservative estimate with respect to the [] study findings. The [] group did not adequately evaluate either the magnitude of the collection efforts or attendant technological advances which we now know positively.
